

# Photography in Focus

In photography, it's practically married to sharpness. An image that is completely sharp is said to be in-focus. An image that's completely blurry is said to be unfocused. In order for a camera to create a focused image, it takes light and runs it through a lens, concentrating the rays on the image sensor inside. Photography in Focus is a comprehensive photography textbook dealing with basic camera functions, lighting, film development, and printmaking for black and white and color photography.
